REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the prior art of record neither discloses nor renders obvious the claimed invention of claim 1, wherein comprising: a device for connecting together a vertically disposed roller screw and roller nut assembly to a stationary member and a moving member, said device comprising: a bearing housing attached onto a fixed end of said roller screw; said bearing housing including at least one bearing and two bearing house pivots radially disposed 180° apart on a horizontal plane perpendicular to the roller screw longitudinal axis: a first universal ring concentrically surrounding said bearing housing; said first universal ring including two mating pivots mated with said two bearing house pivots and two attachment pivots spaced apart and radially disposed 90° from said mating pivots mated with corresponding pivots on the stationary member.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. The examiner notes the newly cited reference, Faitel et al. US 2002/0069770, does not disclose nor render obvious a bearing housing attached onto a fixed end of said roller screw; said bearing housing including at least one bearing and two bearing house pivots radially disposed 180° apart on a horizontal plane perpendicular to the roller screw longitudinal axis (see figure 5, if press crown 14 was considered a bearing housing, 14 does not include a bearing and two bearing house pivots). Furthermore,

Art Unit: 3682

Faitel et al. does not disclose a first universal ring concentrically surrounding said bearing housing (see figure 5, first universal ring does not concentrically surround a bearing housing). Furthermore, Faitel et al. does not disclose a first universal ring including two mating pivots mated with two bearing house pivots and two attachment pivots spaced apart and radially disposed 90° from said mating pivots mated with corresponding pivots on the stationary member (see figure 5, universal ring pivots do not mate with stationary member 14)

Allowable Subject Matter

4. Claims 1-6 are allowed.
